

Content Discovery & Insights

Securely and efficiently search, organize, correlate, share, and bring unprecedented context to content with orchestrated artificial intelligence.

Process and extract crucial information

Employ fully integrated best-of-breed cognitive engines and potent applications acting in concert to transform and analyze content, delivering actionable intelligence to public sector functions

Direct and optimize cognition

Create custom, rule-based workflows incorporating cognitive processing in parallel as well as in a sequenced or chained fashion

Search petabytes of historical and current content in near real-time

Establish and execute direct, multivariate searches against cognitive engine output, through programmatic or ad-hoc means, focusing time resources on the exact content that matters

Collaborate with private and shared libraries

Maintain, share, and leverage secure private libraries of metadata-enriched, correlated content pre-populated from existing sources or grown organically over time based on defined variables

Realize content discovery and insights

Gain unprecedented understanding of content context with cohesive indexing and search capabilities in a broad ecosystem of cognitive engine classes on a single, integrated platform

I don't know how many on that you can attain prior approval from the Association for that chance . Ever actually . Actually I'm assuming you people of content of files the building files and all the other necessary files . If you haven't your full . Actually it was an accommodation . Nobody spoke about and we did never made it . Where it was an accommodation and we never made a formal application about it . And if you take exception to it I'll put it back where it rushed which is right on the killer's mind you want me to do that have a glance you today tomorrow next week . That's where it was it was on that show that John the service and I gently removed it . Am I going to be punished for good . I'll put it back . Was that a yes or no it was a fuck you . But your question .

Je ne sais pas combien sur que vous pouvez obtenir l'approbation préalable de l'Association pour cette chance. Jamais fait. En fait, je suis en supposant que vous les gens de contenu des fichiers les fichiers de construction et tous les autres fichiers nécessaires. Si vous ne l'avez pas votre plein. En fait, il était un logement. Personne ne parlait et nous ne jamais fait. Lorsqu'il était un logement et on n'a jamais fait une demande officielle à ce sujet. Et si vous prenez exception à ce que je vais le mettre là où il se précipita qui est à droite sur l'esprit du tueur que vous voulez me faire qui ont un coup d'oeil vous aujourd'hui demain la semaine prochaine. Voilà où il était il était sur ce spectacle que John le service et je retire doucement. Suis-je être puni pour de bon. Je vais le mettre en arrière. Était-ce un oui ou non il était une baise vous. Mais votre question.

Investigation and Intelligence Analysis

- Instantaneous, centralized content interrogation and access
- Classes of cognition including transcription, sentiment, face and objection recognition, translation, and geolocation
- Correlation against cognitive output, structured data, and metadata indexing and definable, programmatic search with robust alert and monitoring functions

Digital Evidence Management

- Flexibility to index, cognitively process, and search both current and historical content for more comprehensive analytics
- Secure collaboration for missions with multi-agency and multi-function requirements
- Configurable processing to weigh and prioritize cognitive engine selections for accuracy, speed and economics

Smart Catalog Indexing

- Automated time-based indexing of content by cognitive output (words, phrases, objects, faces, OCR, geolocation, and more), file and user-associated metadata in addition to structured datasets
- Ad-hoc and programmatic, multivariate and boolean search across millions of hours and petabytes of content from any combination of sources in seconds

Public Media Monitoring

- Near real-time and historical search across Veritone's vast public index of broadcast television and radio as well as streaming media
- Unmatched analysis for advertising effectiveness, messaging, topic assessment, and situational awareness analysis
